

## Pioneer Energy GridGen Program – Powered by Participate.Energy

Dear Neighbor,

If you've ever thought about adding solar + battery storage to your home—or even if you already have solar—there's a new opportunity in Pioneer that you won't want to miss.

**Introducing the GridGen Program**, a breakthrough energy solution offered by Pioneer Community Energy in partnership with Participate.Energy. This innovative program gives you access to your own on-site solar and battery microgrid—with zero upfront cost and no ongoing maintenance.

Unlike traditional solar purchase or lease programs, GridGen is **not a loan, not a lease, and not a power purchase agreement**. Instead, you're simply billed through your existing Pioneer Energy account for the clean energy your system produces—at a **predictable, low rate for 25 years**.

### Here's what makes GridGen different:

- No upfront investment required
- No maintenance or repair costs
- Fixed, predictable energy rates for 25 years
- Backup power in outages with advanced battery storage
- No credit check or income qualification
- Easily transferrable if you sell your home (no credit check on buyer)

Even if you already have solar, adding battery storage through GridGen can transform your system into a fully functional microgrid—enhancing your energy independence and protecting you from blackouts or peak-time rates.

**We're currently offering complimentary in-home consultations to explain the program, evaluate your home's potential, and answer all your questions.**

There's truly no other offer in California that matches the simplicity, savings, and security of the GridGen Program.

Call us today at **(916) 282-5662** or visit [www.SierraPacificHome.com](http://www.SierraPacificHome.com) to schedule your free consultation.

There's NEVER been a program this good for your community! We are excited to help homeowners opt-in to this amazing benefit from Pioneer Energy.

Your clean energy future is here—with no strings attached.

Jason Hanson, President
